

I've Got A Feeling

Daniel Paul Work (ASCAP/SmileyNote Studios, inc. c2020)

I've got a feeling, deep down inside
You may not hear me, but that's alright
I even wear clothes, a little loud
Don't care what your singing, now that's so cool

Music dripping in painted words
Someone may hear us, but that's alright

I've got a feeling,
we can make a little bit of difference if we try
Can't stop believing,
in all the truth and kindness of many left behind
I've got a feeling,
we can make a little bit of difference if we try
I've got a feeling,
each one of us who acts so tough just needs a little love

Dreaming in color though I am grey
I've got a feeling that you really want to sing along

Robin kept tapping come out and play
maybe it's time to be for real and be okay with that

Beautiful being with you today
Come on get happy, come dance with me

No one can hear you, when you don't sing
when you feel happy maybe sing along and clap with us

I've got a feeling, a sense of freedom
I've got a feeling, you can't keep from smiling
Just a little motion, now can you feel it
We hear you singing, enjoy your new found freedom

I've got a feeling, a sense of freedom (I've got freedom)
I've got a feeling, you can't keep from smiling (I've got freedom)
I've got a feeling, a sense of freedom (I've got freedom)

I've got a feeling,
we can make a little bit of difference if we try
Can't stop believing,
in all the truth and kindness of many left behind
I've got a feeling,
we can make a little bit of difference if we try (2x)

No one can hear me, but that's alright
